

# ARE THERE ANY TESTS YOU COULDN'T IMPLEMENT?

We are looking for a talented

## Automation QA Engineer (M/F/D)

### WHO WE ARE

Triple A Internetshops GmbH is one of the leading e-commerce companies in Europe which serves over 18.000.000 customers and employs more than 500 people worldwide. This includes shops like [www.eis.de](http://www.eis.de), [www.satisfyer.com](http://www.satisfyer.com), [www.bilder.de](http://www.bilder.de), [www.druckerzubehoer.de](http://www.druckerzubehoer.de), and a multitude of other. The constant striving for further development and optimization is clear in the focus of all our businesses and is a fundamental component of our economic success.

### WHAT WE OFFER

To further strengthen the growth of the Triple A family we insure IT competencies at our new Technology Hub at the heart of Kyiv. There, you will become a part of young and dynamic team, working on exciting, challenging and far-reaching projects. You closely collaborate with our experienced international product teams in an agile environment. Our working atmosphere is modern, outstanding office located within the Business Centre Creative State of Arsenal. Our benefits include versatile and flexible working hours, medical insurance, sport and cultural activities – team building events.

### ROLE

· As QA Engineer your mission will be to ensure the highest quality of market leading product in e-commerce industry through quality assurance and testing activities during software development lifecycle

### RESPONSIBILITIES

- Liaise with our business departments to elaborate required test strategies and test cases
- Write documentation, such as QA strategy, Test Plans, Test Cases, Test Scenarios, Checklists
- Develop manual and automation tests on different parts of our web application (backend, APIs, front end interfaces, mobile applications)
- Setup and maintain QA processes, testing environments and infrastructure in close collaboration with DevOps engineer
- Select relevant tools and technologies in the process of maintenance and further application enhancements

- Design and code an automation framework for an end-to-end backend testing, frontend testing, functional and non-functional testing, system testing, load and performance testing
- Technologies: Java, JavaScript, Postman, SOAP/ REST services, TestRail, Docker, Cloud environments: AWS, Google Cloud, Jira, Confluence, any other tool to execute automation testing process and standards

### YOUR PROFILE

- 3+ years of commercial experience as QA Engineer in technology company
- Understanding software development lifecycle, Agile methodology, Scrum
- Good knowledge of functional and non-functional testing techniques, different types of testing such as regression, load, performance testing, etc.
- Experience in quality assurance with e-commerce solutions, APIs and mobile applications
- Working experience in creation/support of test documentation (test cases, test suites, checklists, bug reports)
- A curious and flexible personality with strong analytical and problem-solving skills
- Ability to write in a clear and concise manner and to communicate effectively in English or German

### HOW TO APPLY

To apply, send your cover letter (including salary expectations) and resume to e-mail: [recruiting-kyiv@aaa-gth.com](mailto:recruiting-kyiv@aaa-gth.com), using the subject line "Automation QA Engineer (m/f/d)."
