

IS BUILDING APPLICATIONS FOR THE IOS PLATFORM YOUR GUILTY PLEASURE?

We are looking for a talented IOS Software Engineer (M/F/D)

WHO WE ARE

Triple A Internetshops GmbH is one of the leading e-commerce companies in Europe which serves over 18.000.000 customers and employs more than 500 people worldwide. This includes shops like www.eis.de, www.satisfyer.com, www.bilder.de, www.druckerzubehoer.de, and a multitude of other. The constant striving for further development and optimization is clear in the focus of all our businesses and is a fundamental component of our economic success.

WHAT WE OFFER

To further strengthen the growth of the Triple A family we insource IT competencies at our new Technology Hub at the heart of Kyiv. There, you will become a part of young and dynamic team, working on exciting, challenging and far-reaching projects. You closely collaborate with our experienced international product teams in an agile environment. Our working atmosphere is modern, outstanding office located within the Business Centre Creative State of Arsenal. Our benefits include versatile and flexible working hours, medical insurance, sport and cultural activities – team building events.

ROLE

· As IOS Software Engineer you will be a key person in the end-to-end design, development and ongoing maintenance and delivery process of our mobile applications on IOS platform

RESPONSIBILITIES

- Work closely with our project management and development team in our German headquarters to define project scope, goals and deliverables
- Implementing mobile applications, delivering new features as well as maintaining and improving the existing features with an incremental and continuous improvement approach
- Delivering high quality IOS apps using agile practices
- Understand business requirements and translate them into technical requirements
- Support the entire application lifecycle, including concept, design, test, release and support
- Stay up to date with the latest technology trends
- Mentor other developers in the team
- Technologies: IOS: Swift, Objective-C, Java libraries for React Native, JavaScript, React Native, ReactJS, Kotlin, RESTful API, HTML, CSS

YOUR PROFILE

- Knowledge and commercial experience of IOS mobile application development 4+ years
- Knowledge of SWIFT, React Native and ReactJS will be a plus
- Experience with Bluetooth (BLE) integration
- Experience in integrating Swift/Objective-C/ Java libraries with React Native
- Experience with the full software development lifecycle for Mobile Apps, as well as, unit and UI tests
- Knowledge of programming and architecture patterns
- Experience building native mobile applications for iOS (for Android will be a plus, as well)
- Proficient understanding of web markup, including HTML5, CSS3 and of JavaScript frameworks
- Experience working with RESTful APIs to integrate with our backend e-commerce solutions
- Bachelor or higher diploma in Computer Science or related technical field
- A flexible personality with strong analytical and problem-solving skills
- English or German communication skills: level B1/B2 or higher
- Knowledge and commercial experience of React-Native cross-platform mobile application development will be a plus

HOW TO APPLY

To apply, send your cover letter (including salary expectations) and resume to e-mail: recruiting-kyiv@aaa-gth.com, using the subject line "IOS Software Engineer (m/f/d)."
